

What is wrong with this code?

1.

```
print("Hello, world!")
```

2.

```
import random
number = Random.randint(1, 10)
```

3.

```
guess = input("Guess: ")
if guess == number:
    print("Correct!")
```

4.

```
if guess = number:
    print("Correct!")
```

5.

```
while guess != number
    print("Try again")
```

6.

```
if guess < number:
    print("Too low")
```

7.

```
guess = int(input("Guess: "))
while guess != number:
    print("Try again")
```

8.

```
if guess < number:
    print("Too low")
else guess > number:
    print("Too high")
```

9.

```
guess == int(input("Guess: "))
```

10.

```
import random

number = random.randint(1, 10)
guess = int(input("Guess: "))

if guess < number:
    print("Too low")
if guess > number:
    print("Too high")
else:
    print("Correct!")
```
