

1. GMail

- Good prompt:

Using my Gmail:

Goal: Identify emails that require action

Input: My last 10 unread emails

Output:

- Sender
- One-line summary
- Required action (if any)

Constraints:

- Ignore promotions and newsletters
- Be concise
- Do not invent missing details

- Combo prompt (GMail + Google Calendar):

Using my Gmail and Google Calendar:

Goal: Create a weekly action plan

Step 1:

- Identify important emails requiring action

Step 2:

- Check my calendar for available time this week

Step 3:

- Suggest when to handle each email task

Output:

- List of tasks
- Suggested time slots

Constraints:

- Do not overlap with existing events
- Be concise and structured

2. Google Drive

- Good prompt:

Using my Google Drive:

Goal: Convert the selected document into structured notes

Output:

- Section headings (if identifiable)
- Bullet points under each section
- One key takeaway at the end

Constraints:

- Use only the document
- Do not add outside information
- Keep the bullets concise

◦ Combo prompt (Google Drive + GMail):

Using my Google Drive and Gmail:

Goal: Share document insights

Step 1:

- Extract key points from the document

Step 2:

- Draft an email summarizing these points

Output:

- Subject line
- Email body

Constraints:

- Keep it under 150 words
- Do not invent information

3. Google Calendar

◦ Good prompt:

Using my Google Calendar for this week:

Goal: Identify assignments and quizzes

Output:

- Course name (if available)
- Title
- Due date

Constraints:

- Only include events that appear to be assignments or quizzes
- Ignore regular class meetings
- Use exact dates from the calendar

- Combo prompt (Google Calendar + Google Drive):

Using my Google Calendar and Google Drive:

Goal: Create a study plan

Step 1:

- Identify upcoming assignments from my calendar

Step 2:

- Use related documents (if available) for context

Step 3:

- Suggest a structured study plan

Output:

- Tasks by day
- Suggested time blocks

Constraints:

- Do not overlap with existing events
- Be realistic and concise

4. Zillow

- Good prompt:

Using Zillow:

Goal: Help me choose a place to rent

Location: Batesville, AR

Criteria:

- Max rent: \$1200
- At least 2 bedrooms

Output:

- 3 to 5 suitable options
- Price
- Bedrooms
- One advantage
- One disadvantage

Constraints:

- Base reasoning only on listing details
- Do not invent missing information

- Combo prompt (Zillow + Google Calendar):

Using Zillow and my Google Calendar:

Goal: Plan apartment visits

Step 1:

- Find 3 suitable apartments

Step 2:

- Check my calendar for free time

Step 3:

- Suggest visit times

Output:

- Apartment list
- Suggested visit slots

Constraints:

- Do not overlap with existing events
- Be realistic about timing

5. AccuWeather

- Good prompt:

Using AccuWeather:

Goal: Plan outdoor work for the next 3 days

Location: Batesville, AR

Output:

- Daily forecast summary
- Best time blocks for outdoor activity
- Rain or storm risks

Constraints:

- Use forecast data only
- Be specific about dates and times

- Combo prompt (AccuWeather + Google Calendar):

Using AccuWeather and my Google Calendar:

Goal: Schedule outdoor activities

Step 1:

- Get weather forecast for next 3 days

Step 2:

- Check my calendar for availability

Step 3:

- Suggest suitable outdoor time slots

Output:

- Weather summary
- Recommended time blocks
- Conflicts (if any)

Constraints:

- Avoid rain periods
- Do not overlap with events

6. DataCamp

- Good prompt:

Using DataCamp:

Goal: Recommend a short learning plan

Topic: Python for data analysis

Output:

- 3 recommended courses or modules
- Why each fits
- Suggested order

Constraints:

- Beginner-friendly
- Realistic for one week

- Combo prompt (DataCamp + Google Calendar):

Using DataCamp and my Google Calendar:

Goal: Create a learning schedule

Step 1:

- Identify recommended courses

Step 2:

- Check my calendar for free time

Step 3:

- Allocate study sessions

Output:

- Course plan
- Scheduled study blocks

Constraints:

- Do not overlap with existing events
- Keep sessions realistic (1–2 hours)
