

NAME: _____ (pledged)

POINTS: _____ / 10

1. Key difference between traditional programming and machine learning?
2. What does it mean that machine learning is “not explicitly programmed”?
3. What role does **data** play in machine learning systems?
4. What is a “model” in machine learning?
5. What is supervised learning?
6. What is unsupervised learning?
7. What is reinforcement learning?
8. Why is machine learning described as an optimization problem?
9. What is an example of a supervised learning task discussed in class?
10. Why is “ground truth” important in machine learning?
